

AT-90T UHF Unidirectional Antenna

Features:

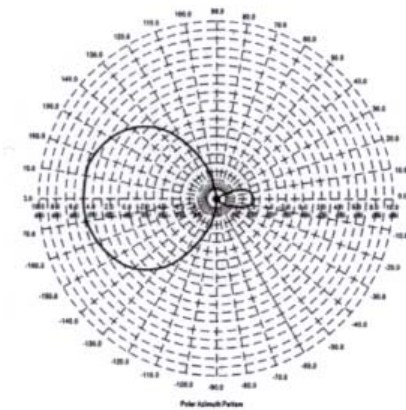

This product is a professional UHF directional antenna covering the RF bandwidth from 600 to 1000 MHz and provides an additional 6 dBi of gain. The AT-90T is a directional antenna providing superb receiving and transmitting performance when targeted in a specific direction. This product is suitable for indoor or outdoor all-weather applications.

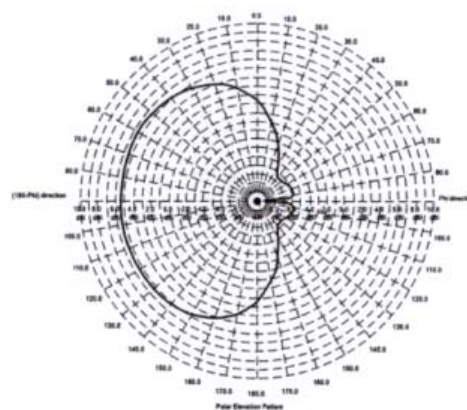

Specifications:

- Frequency Range: 600MHz to 1GHz
- Antenna Gain: 4-6 dBi
- VSWR: $\leq 2:1$
- 3dB Beam-width: 80°E-Plane and 140°H-Plane
- Connector: TNC female
- Dimensions: 337 × 266 × 40 mm
- Weight: 20.4 oz
