

MIPRO Wireless

WIRELESS RECEIVERS

200 SERIES VHF: The Ultimate Single-Frequency System

MR-212: single channel VHF true diversity fixed frequency receiver

MR-222: dual channel VHF true diversity fixed frequency receiver

The MIPRO 200 Series true diversity receivers are equipped with MIPRO's "Pilotone" and "NoiseLock" dual-squelch circuitry, which prevents random noise and enables silent "no-pop" single On/Off switch transmission operation. The AC switching power supply eliminates the hated plug-in "wall wart" transformer.

An internal dual-bay battery charger and a NiMH rechargeable battery are included for the transmitters which will also run an incredible 30 hours on an ordinary alkaline 9V battery. The MIPRO MR-200 Series are available in handheld, lavalier, head worn and guitar versions. Up to 18 systems in the MR-212 and 16 systems in the MR-222 can be combined for interference-free use in any location, making it the obvious choice in affordable single-frequency systems.

TRANSMITTERS

Select one of the following transmitters to complete your MR-200 Series Wireless System:

MH-202: VHF, single frequency, handheld dynamic microphone transmitter

MH-206: VHF, single frequency, handheld condenser microphone transmitter

MT-103X: VHF, single frequency, body-pack transmitter, w/o microphone
(Lavalier, head worn and instrument microphones are available for use with body-packs.)
