For questions on frequencies available, please consult the [MIPRO Wireless VHF Frequency Plan \(PDF\)](#).

500 SERIES VHF: Compact Single-Frequency VHF

MR-515: VHF, non-diversity, single frequency, 1/2 rack

MIPRO's affordable MR-515 single channel non-diversity VHF wireless systems include impressive features not normally available at this price. Highly efficient circuitry allows the transmitters to operate more than 30 hours on a 9V alkaline battery and MIPRO's "Pilotone/NoiseLock" dual squelch circuitry keeps everything quiet when the transmitter is in the standby mode as well as providing "no-pop" operation of the on/off switch.

Both 1/4" and XLR outputs are standard and the space-saving half-rack receivers can be easily combined to operate as a dual-channel system in a single rack space, making the MR-515 ideal for numerous applications.

Optional FB-11 single half-rackmount brackets or FB-12 dual-rackmount brackets are available.

TRANSMITTERS

The MR-515 is packaged with one of the following transmitters:

[MH-202:](#) VHF, single frequency, handheld dynamic microphone transmitter

[MH-206:](#) VHF, single frequency, handheld condenser microphone transmitter

[MT-103X:](#) VHF, single frequency, body-pack transmitter, w/o microphone ([Lavaliers](#), [headworn](#) and [instrument microphones](#) are available for use with body-packs.)

ACCESSORIES

[FB-11](#) Single Half-Rack Space

[FB-12](#) Dual Half-Rack Space

[AD-20](#) VHF Antenna Divider

[AD-20A](#) VHF Extension Antenna Kit

[AD-20B](#) VHF Booster
