

HANDHELD MICROPHONE TRANSMITTERS

ACT-707H PLL Synthesized
 100-Channel Preset in Each 24MHz Bandwidth
 Premium Plastic Housing

Features:

- World's first ACT-function. Once you press the [ACT] key on the receiver panel, the transmitter channel is automatically locked to the receiver.
- Maximum 148db SPL is achieved by the proprietary "Photo-cell Coupling" high dynamic range modulation circuitry.
- Advanced efficient transmitting and low power consumption circuitry design with 2 AA batteries provides long operating hours.
- LCD panel displays group, channel, error code and battery meter status simultaneously.
- Integrated antenna, fine-crafted and ergonomically-designed housing.
- Extremely low handling-noise feature leads the competitors.
- Choice of standard, premium and professional transmitters.
- Unique dual steel microphone head-grille design for anti-pop noise suffers no impact damage when dropped.
- The supercardioid vocal capsule with high fidelity, wide frequency response, high dynamic range, and transient response contributes the best sound quality in the digital audio age.

Specifications:

| | | |
|----|---------------------|---|
| 1 | ACT Function | Yes |
| 2 | RF Output Power | 10mW (or according to regulations) |
| 3 | Oscillation Mode | PLL Synthesizer |
| 4 | Spurious Emissions | < -60dBc |
| 5 | Maximum Input Level | 148dB SPL |
| 6 | Category | Handheld |
| 7 | Microphone Capsule | Condenser / Dynamic |
| 8 | Input Connector | NC |
| 9 | Battery | AA x 2 |
| 10 | Dimensions | 2" diameter x 9.3" 50 mm diameter x 235 mm |
| 11 | Weight | 8.8 oz |

| | | |
|----|-----------|--|
| | | 250 g |
| 12 | Approvals | Complies with North American, Asian & European Regulations |
