

Mipro Wireless UHF Frequency Plan

All Mipro Wireless UHF products are FCC approved and operate in the 914-928 MHz band.

Please select a UHF frequency from the following Frequency Selection Chart.

SIMPLE IS BEST. MIX & MATCH FREELY - ALL MIPRO FREQUENCIES ARE COMPATIBLE
across all Mipro models & series, affording maximum flexibility and ease of use.

Frequency Selection Chart

QUARTZ-LOCKED "FIXED-FREQUENCY" COMPONENTS				
	MR-801/MA-707UM	MH-801D/MH-801/MT-801	Additional UHF Frequencies	
	Receivers	Transmitters	MR-801, MH-801 & MT-801 Only	
	UHF Frequency	UHF Frequency	UHF Frequency	UHF Frequency
	914.275	914.275	622.500	671.600
	914.900	914.900	625.025	672.550
	916.375	916.375	626.575	674.850
	916.725	916.725	632.775	678.700
	920.200	920.200	635.800	680.075
	921.200	921.200	637.900	686.725
	926.800	926.800	641.500	689.525
			642.425	691.325
TOTAL # OF CHOICES	7	7	8	8
MAXIMUM # COMPATIBLE	7	7	8	8

NOTE: It is possible to combine MR-801 systems from all frequency groups for a total maximum of 23 systems that can be used in any one location at the same time.

TIP:

Generally, it also helps to NOT mix different wireless system brands as each manufacturer has their own multi-frequency allocation program making it more difficult to avoid frequency incompatibility when multiple brands are used. Ideally, to ensure maximum system compatibility, use your Mipro wireless components with other Mipro Wireless. In the real world, however, this may be sometimes unavoidable. In such cases, please contact your local Sales Rep for assistance.
