

ACT-8H Digital Handheld Transmitter

These revolutionary encrypted digital wireless systems feature a 128-bit encryption key for maximum security against unauthorized listening, 24-bit audio quality, true digital RF transmission, SmartEQ™ microphone modeling and are PC-controllable.

ACT-8H Features

- Durable magnesium alloy construction with ergonomic design.
- Anti-pop & anti-roll microphone capsule module with extremely low handling noise.
- Bright LCD displays working channel, transmitter battery status, input levels and error code.
- Integrated antenna provides maximum transmission efficiency.
- Patented color caps protect on/off and audio sensitivity switches and provide identification.
- Built-in and detachable li-polymer battery pack can be recharged alone or together with transmitter. Battery delivers eight to ten continuous hours of operation from a 4-hour charge.
- World’s first ACT function, allowing rapid and precise transmitter frequency set-up.

Specifications

Dimensions	50(Φ) × 248(L) mm / 2(Φ) × 9.8(L) "
Weight	300g / 10.6oz
Element	Cardioid Condenser
Antenna	Built-in
RF Power Output	≤ 50mW (Country Dependant)
Spurious Radiation	≤ -60dBc
Frequency Generation	Phase-Locked Loop (PLL)
Frequency Stability	≤ ±0.005% at 0~50°C
Modulation Type	Digital Modulation
Audio Compression	Combiner DSP Technology
Battery Type	1200mA/h Rechargeable Lithium-Polymer
Battery Life	≥ 8 Continuous Hours
